OREGON DEPARTMENT OF FORESTRY

INCIDENT MANAGEMENT TEAM

Incident Objectives	1. Incident Name Horse Prairie	2. Date Prepared 9/7/2017	3. Time Prepared 2300
4. Operational Period (Date and Time) 9/8/2017 0600 - 1800 Day Shift			
5. General Control Objectives for the Incident (include Alternatives)			
<p>a. Fight fire aggressively and safely; maintain LCES at all times.</p> <p>b. Minimize fire size primarily through the use of direct tactics and a staffed night shift where possible.</p> <p>c. Keep fire South of Olalla Creek, West of Doe Creek, North of Middle Creek, East of Union Creek</p> <p>d. Maintain and build positive relationships with impacted landowners, public, and cooperating agencies.</p> <p>e. Maintain strict financial records and fiscal and equipment accountability.</p> <p>f. Act in a respectful and professional manner around the community.</p> <p>g. Protect tribal, cultural, archeological, and sensitive plant sites by coordinating with Resource Advisors.</p> <p>h. Provide for initial attack and assistance as requested on new and emerging incidents.</p>			
6. Weather Forecast for Period			
See attached weather forecast			
7. General Safety Message			
<p>*Anticipate and look for changes in weather and fire behavior</p> <p>*Initiate all actions based on current and expected fire behavior</p> <p>*Communicate hazards and mitigation measures to all personnel</p> <p>*Stay hydrated</p>			
8. Attachments (mark if attached)

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Horse Prairie

DATE: September 8, 2017

Operation period: Day

Major Hazards and Risks:

Thunderstorm Safety

Shifting Winds

Cell Phones

Fire Order of the Day – Keep informed on *Fire* weather conditions and forecasts

Stay Focused. Maintain your SITUATIONAL AWARENESS!! Do not become complacent.

From Lessons Learned Center: Rapid Lesson Sharing

SPIDER BITES: 4 incidents in 10 days

In the fall, spiders become more aggressive when they are getting ready to reproduce. Their venom is more potent. These spider bite incidents have all advanced to a serious level due to the time lapse between being bit and coming into the Medical Unit for treatment. Yes, we all know you don't want to be taken off the line working. All the more reason to get attention earlier. **DO NOT DELAY SEEKING TREATMENT!!**

Encountering a Cougar:

1. Stay calm and stand your ground
2. Maintain direct eye contact
3. Back away slowly
4. Do not bend down or turn your back on the Cougar
5. Do not run! Running triggers a response in Cougars which could lead to an attack
6. Raise your voice and speak firmly
7. If the Cougar seems aggressive; raise your arms to make yourself look larger and clap your hands
8. If in the very unusual event that the cougar attacks you, fight back with sticks, rocks, tools or any other available items.

Cell Phones: House Bill 2597 clarifies that anything a driver could think of doing with a cell phone while driving is illegal. If a police officer sees the white glow of the screen illuminating a driver's face, even if the officer didn't see the driver talking or fingering the keys, the officer has witnessed a violation.

I think whether you're having setbacks or not, the role of a leader is to always display a winning attitude.
Colin Powell

Squat to lift and lower. Do not bend at the waist.

Keep you low back bowed in while bending over.

Keep the weight as close to you as possible.

Bow your back in and raise up with your head first.

If you must turn, turn with your feet, not your body.

Put the weight down by keeping your low back bowed in.

Keep your feet apart, staggered if possible.

Wear shoes with non-slip soles.

Never jerk or twist

**Today's discussion is from the
Fireline Safety Category.**

COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES

Five common denominators that contribute to accidents/incidents have been identified through studies of tragedy fires. It is important for firefighters to readily recognize the following common denominators so that future tragedies can be prevented:

- ♥ Most incidents happen on smaller fires or on isolated portions of larger fires.
- ♥ Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in flare-ups or extreme fire behavior. In some cases, tragedies occur in the mop-up stage.
- ♥ Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
- ♥ Fires run uphill surprisingly fast in chimneys, saddles, gullies, and on steep slopes.
- ♥ Some suppression tools, such as helicopters or airtankers, can adversely affect fire behavior. The blasts of air from low-flying helicopters and airtankers have been known to cause flare-ups.

Safety Analysis of Tactical Actions (215A)

Incident Name: Horse Prairie				Date and Time Prepared: 9/7/2017				Operational Period: Day 9/8/2017					
TACTICAL HAZARDS													LCES MITIGATION
	A/M		P		Q	S	T		Y				
Indirect Fireline					X	X	X						Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously
Downhill Fireline					X	X	X						Follow downhill line standards. Bring fire with you. Insure lookout can see entire area. Identify safety zones and escape routes before starting work. Use page 9 of Incident Response Pocket Guide. Establish LCES.
Understung Fireline					X	X	X						Cup trench. Post lookout that can see all areas of under slung line. Establish LCES.
Mid-Slope Fireline					X	X	X						Insure that lookouts can see ALL area of mid slope line as well as areas upslope of mid slope line. Establish Trigger Points and reassess as fire or weather conditions change. Establish LCES.
Frontal Assault					X	X	X						Identify thresholds for reassessment. Establish LCES.
No Anchor Points					X	X	X						Find/construct safe, effective anchor before engaging. Establish LCES.
Extreme Conditions (Spotting, Wind)					X	X	X						High potential given because of low live fuel moisture and high probability of ignition. Anticipate. Identify thresholds for reassessment, monitor weather. Establish LCES.
Heavy Equipment	X				X	X	X						Do not work down slope below heavy equipment. Establish communications with operator. Post lookout for rolling debris. Be aware of loose soil and rock. Establish LCES.
Air Ops: Multi Aircraft	X		X		X	X	X		X				Insure that all personnel are at least 500 feet from bucket or retardant drops. Utilize air attack. Establish LCES.
Hazard Trees/Snags	X		X		X	X	X		X				Assess, Identify, Communicate, Isolate, Mitigate. Establish LCES.
Hazardous Materials													Utilize the Incident Response Pocket Guide. Identify and isolate any suspected hazardous materials. Notify supervisor and warn others in area. Keep your distance. Establish LCES.
Unburned Area Unknown Fires	X		X		X	X	X		X				High potential for re-burn in brush and conifers preheated by earlier burn. Blowdown areas keep a close eye on. Post lookouts. Watch for increase in burn activity. Monitor weather for change in RH and or wind conditions. Establish LCES.
Transportation	X		X		X	X	X		X				Drive defensively with headlights on, seatbelts fastened. Stay to the right side of the road. Yield to uphill traffic and flaggers. Drive slowly and watch out for the other person. Establish LCES.
Communication	X		X		X	X	X		X				Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.
Steep Terrain Gravity Hazards	X		X		X	X	X		X				Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose or wet soil and rock. Do not work below heavy equipment. Establish LCES.
Environmental Hazards	X		X		X	X	X		X				Bees, Snakes, Bears and other animals are in the area. Carry medical kits for those with allergic reactions, do not harass or instigate any confrontations with animals, warn others of presence. Poison Oak - Preventative measures, locate, isolate, mitigate.
Structures							X		X				Follow page(s) 12 - 16 of Incident Pocket Response Guide. Establish LCES.
Transfer of Command													Make sure you understand your assignment. Know who your supervisor is and who is working for you. Do not assume. Re-brief all resources.
Span of Control					X	X	X						Adhere to Span of Control Guidelines-5:1. Ensure Overhead is sufficient for operation and identify chain of command. Ensure everyone receives a briefing. Retain control at all times.
Falling Operations	X		X		X	X	X		X				Post road guards. Have a falling boss who can be in contact with crews working in the area. Use qualified Fallers.
Power Lines						X	X						Watch for down power lines and poles. Identify, isolate and report. Notify supervisor and warn others in area. Keep your distance.
I.A.	X		X		X	X	X		X				Follow the 10 and 18, LCES - before engaging, re-evaluate for each new start!

Fire Weather Forecast

FORECAST NO: 16

PREDICTION FOR: Day Shift

SHIFT DATE: Friday 9/8/2017

TIME AND DATE ISSUED: 9/7/17 2100hrs

INCIDENT: Horse Prairie Fire

UNIT: Douglas Forest Protection Association

SIGNED: Mary Wister 240-778-5303 (cell)

Incident Meteorologist (IMET)

Warming Trend with Drier Conditions over the Weekend and Early Next Week

Yesterday's rain and cooler temperatures have caused the humidity to increase and fog to develop. There will be partial clearing of the fog later today. Temperatures today will be near seasonal, and there may be a light shower or two during the day due to the continued moisture and weak instability over the area.

WEATHER FORECAST for Today:

SKY/WEATHER: Mostly Cloudy in the morning. Partly Cloudy in the afternoon. A slight chance of showers.

Areas of fog, mainly in the morning. Smoky.

Max Temperature: 70-75.

RH: Around 60 percent along ridges. Around 70 percent in the valleys.

WINDS: -20 foot-

Upslope/Upvalley 2-5 mph. Winds East 3-6 along Cow Creek in Div S.

-Ridgetop-

Northeast 2-5 mph...becoming Northwest 4-8 mph in the afternoon.

HAINES INDEX: 3 (Very Low).

Transport Winds: South around 25 mph.

CWR (>0.25"): 10%.

Tonight:

SKY/WEATHER: Partly Cloudy. Areas of smoke and areas of fog.

Minimum Temperature: 55-60.

Maximum RH: 90-100 percent.

WINDS: -20-foot-

Northwest 3-6 mph...becoming Northeast 2-4 mph.

-Ridgetop-

Northwest 3-7 mph...becoming North-Northeast 2-5 mph.

HAINES INDEX: 2 (Very Low)

Saturday:

SKY/WEATHER: Partly Cloudy. Increasing high clouds late. Areas of fog in the morning.

Max Temperature: 74-79.

RH: 40-50 percent.

WINDS: -20 foot-

North 1-4 mph...becoming Northwest 2-5 mph in the afternoon.

-Ridgetop-

North 2-5 mph...becoming Northwest 5-10 mph in the afternoon.

HAINES INDEX: 2 (Very Low)

Transport Winds: West-Northwest around 25 mph.

Stability/Inversion: Low level inversion weakening, but not breaking, in the late afternoon

Extended Outlook:

SUNDAY through TUESDAY... Mostly clear. Lows 50 to 60. Warmer with Highs in the 80s. North winds 5 to 10 mph. Gusts to 15 mph along ridgetops Sunday.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 13	TYPE OF FIRE: Wildland
FIRE NAME: Horse Prairie	OPERATIONAL PERIOD: Sept. 8, Day Shift
DATE ISSUED: Sept. 6, 2017	TIME ISSUED: 2000
UNIT: DFPA, Central Unit	SIGNED: <u>Mike Haasken</u> <i>MH</i> Typed/printed: Mike Haasken

INPUTS

WEATHER SUMMARY: .DISCUSSION... Yesterday's rain and cooler temperatures have caused the humidity to increase and fog to develop. There will be partial clearing of the fog later today. Temperatures today will be near seasonal, and there may be a light shower or two during the day due to the continued moisture and weak instability over the area.

TOPOGRAPHY: Very steep ridge and valley topography with Table Mountain on the north and Cow Creek on the southeast part of the fire. Elevation ranges from 3,300' on Table Mountain to 800' in Cow Creek. Elevations increase above Cow Creek on the southeast end of the fire to 3,100'.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuels are timber ranging in age from new plantings to old growth with a brush and litter understory and grass and brush fields. Fire Behavior during the first several days was extreme with running, crowning and spotting up to ½ mile. Some runs have been downhill with predominantly northerly winds.

Forecasted Indices: (Silver Butte RAWS, about 5 miles southeast of fire)

1 hour fuel moisture: 14% (-3); **10 hour fuel moisture:** 14% (-1); **100 hour fuel moisture:** 14% (+3); **1000 hour fuel moisture:** 10% (same); **Live Woody fuel moisture:** 70 (same)

Energy Release Component: 50 (+2); **Probability of Ignition:** Shaded due to smoke/clouds: 10%.
Unshaded: 20%.

Expected Fire Behavior: Expect minimal fire behavior; mainly smoldering in heavy fuels and duff.

SPECIFIC: All Divisions: During mop up, watch for tree, stump and root tunnel burnout and ash pits.

Division S: Depending on rainfall amount, there is a 300 acre unburned island in Iron Mountain Creek that may be burned out.

AIR OPERATIONS: Morning fog and smoke may limit air operations. Myrtle Creek Sunrise is 6:47 AM; Sunset is 7:37 PM.

SAFETY: Snags are spread out through the burn area! Even a small 6" diameter snag can cause injury or worse.

Working Around Inmates

Since 1951 The Oregon Department of Forestry (ODF) has utilized inmate labor to support wildland fire suppression efforts statewide. Standards have been established to protect the public and maintain order within the inmate work program. There is an expectation that security standards will not be compromised. This expectation extends to contractors, volunteers, and other agency and non-agency staff working on ODF managed fires.

You will recognize inmates by the orange stenciling on their clothing with the words "inmate" and the name of the institution that they came from. Inmates are rigorously screened before they are eligible for the work program. Violent crimes, sexual crimes, arson, and murder will keep an inmate from qualifying. Inmates working for ODF are typically highly motivated, trained, and look forward to learning new skills and giving back to local communities. They will not be left unsupervised or unaccounted for more than 30 minutes while on the fire line. While in fire camp, inmates are continuously supervised by DOC and ODF staff. It is ok to be friendly and speak with inmate workers, but here are some things you need to know:

- Inmates are not authorized to possess anything not provided by the Oregon Department of Forestry or Department of Corrections that is required for their work activity or sustenance. **Any items not issued by ODF or DOC is considered contraband.** Examples of contraband are cigarettes, chew, drugs, alcohol, firearms, non-stenciled clothing items, matches, lighters, sticks, animals, money, cell phones, or other people's items. Providing contraband to an inmate can in some cases result in a Class C, B, or A felony.
- Inmates should not be allowed access to computers, tablets, phones, fax machines, non-issued mobile radios, vehicle keys, facility keys etc.
- Enjoy light conversation with inmates but avoid sharing deeply personal information. Also do not engage in trying to solve an inmate's personal problems. Trained correctional counselors and security staff are hired to help inmates solve their problems. Feel free to express gratitude for the hard work that they do.
- Staff, contractors, and volunteers should not provide any type of gift or do any type of favor for an inmate. This includes making phone calls, mailing letters, post cards, emails, text messages or posting Facebook messages/pictures for inmates. Remember: **NO GIFTS, NO FAVORS.**
- Be aware of the Federal Prison Rape Elimination Act (PREA). It is a violation of Federal and State law to expose yourself to an inmate, engage in voyeurism, or have any sexual contact with an inmate. Professional boundaries are expected at all times. Sexual topics of discussion or jokes around inmates is inappropriate. Dress and act appropriately around inmates.
- Reporting- when you see an inmate acting strangely or doing/saying something that is clearly inappropriate do not hesitate to speak with the nearest Corrections Officer, or Forestry Crew boss.
- If an inmate is injured during the course of his duties, respond as you would for any other person and communicate with DOC security staff immediately thereafter.

When Inmates are working for the Oregon Department of Forestry they are learning technical skills, work ethic, problem solving skills and social skills that can help them become productive citizens when they are released. Please help us maintain a secure and positive inmate program by adhering to these policies and laws.

HORSE PRAIRIE FIRE

MOP UP STANDARDS

September 5th, 2017

Objective: The Horse Prairie Fire is to be mopped-up to a standard which the likelihood of the fire escaping the containment lines unlikely. The standards below can be flexible and should be applied based on physical conditions present, considerations for firefighter safety, and the expertise of the Incident Management Team (IMT) as long as the objective is achieved. These standards apply to all lands within the fire perimeter.

- Grid the green out to 300 feet from the fire perimeter for two burning periods
- Mop up 100% into hard black a minimum of 200 feet
- Mop up 100% all spot fires, in addition, a route to them will be flagged and the perimeter mapped in GIS
- Line unburned islands and drainages within 500 feet of the perimeter if they are not within the designated mop up area
- Mop up to 500 feet into hard black any dirty burn areas and areas of higher fuel concentrations. The decision to mop up this far into the fire will be based on the expertise of the IMT which is to consider fuels, aspect, wind exposure and firefighter safety
- Heat detecting equipment will be used to detect for hot spots within 200 feet of the perimeter including spot fires
- Complete felling of all snags and fire damaged trees that have been identified as a safety concern, have the potential to cause spotting outside control lines or is within 300 feet of major travel corridors, structures or railroad infrastructure.

Resource Protection on BLM Lands

Horse Prairie Fire

- Avoid application of retardant, foam or other chemicals to waterways unless the fire is deemed a threat to human safety or private property.
- Avoid use of dozers in riparian areas.
- Notify Resource Advisor of location if cultural artifact items are found. Remember, removing cultural artifacts is illegal.
- Locate fire lines to minimize directing water into waterbodies or wetlands.
- There are several Spotted Owl and Marbled Murrelet Nest sites near the current fire area. When planning suppression activities in older forests work with READ's to reduce impacts.
- If drafting out of Olalla Creek, Cow Creek, Union Creek or Doe Creeks use 3/32" screens on draft intake. Screening material and zip ties can be picked up at supply.
